Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	09/742,551	FRENDO ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	Peng Ke	2174	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 16 April 2005.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 8-11, 13 and 44-53 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 8-11, 13 and 44-53 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
    - a) All    b) Some \* c) None of:
      1. Certified copies of the priority documents have been received.
      2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
      3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

This action is responsive to communications: Amendment, filed on 4/16/05.

This action is final.

Claims 8-11, 13, and 44-53 are pending in this application. Claims 8, 44, and 49 are independent claims. In the Amendment, filed on 4/16/05, claim 44-53 were amended and claims 1-7, 12, and 14-43 are cancelled.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-11, 13, and 44-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bendinelli (US 6,061,719) in view of Moraes (US 6,014,502) further in view of Lemmons et al. (US 2002/0034980).

As per claim 8, Bendinelli teaches in a server computer system communicatively coupled to the Internet, a method for providing a user with Web-based information associated with program content viewable on a television, said method comprising:

a) receiving information at said server computer system via the Internet, (col. 3, lines 12-35) said information that identifies program content (col. 3, lines 12-35) that is being received by at a television from a broadcaster said channel number identified by a set top box coupled to said television and to the Internet;

b) identifying at said server computer system a set of Uniform Resource Locators (URLs) for Web sites associated (col. 5, lines 57-68); and

However, Bendinelli fail to teach

c) communicating one or more of said URLs from said server computer system to a computer system that is communicatively coupled to said server computer system via the Internet, wherein said server computer system uses information in a user profile to screen said set of URLs and to select from said set of URLs said one or more URLs that are communicated to said computer system; wherein said one or more URLs are stored at said computer system separately from said program content such that said one or more URLs are retrievable from said computer system without accessing said program content, wherein said identifying and communicating are performed automatically without user intervention; and

wherein said program content is displayed on said television and Web-based information associated with said set of URLs is retrieved and displayed separately on said computer system.

Moraes teaches a method wherein:

c) communicating one or more of said URLs from said server computer system to a computer system that is communicatively coupled to said server computer system via the Internet, wherein said server computer system uses information in a user profile to screen said set of URLs and to select from said set of URLs said one or more URLs that are communicated to said computer system; wherein said one or more URLs are stored at said computer system separately from said program content such that said one or more URLs are retrievable from said computer system without accessing said program content, wherein said identifying and

Art Unit: 2174

communicating are performed automatically without user intervention; (col. 19, lines 9-29, col. 20, lines 46-56)and

wherein said program content is displayed on said television and Web-based information associated with said set of URLs is retrieved and displayed separately on said computer system.(col. 12, lines 22-58)

It would have been obvious to an artisan at the time of the invention to include Moraes' teaching with the method of Bendinelli in order to provide users with URLs of their interests without user looking for them online.

However they fail to teach a channel number that is sent to said server computer system from said set top box.

Lemmons et al. teaches a channel number that is sent to said server computer system from said set top box.(paragraph 0042; It is inherent that the channel number is send back to server in order to identify the reverse channels)

It would have been obvious to an artisan at the time of the invention to include Lemmons' teaching with the method of Bendinelli and Moraes in order to provide users with ability to play game over the cable system.

As per claim 9, Bendinelli, Moreas, and Lemmons teach the method as recited in Claim 8. Moraes teaches wherein said step b) further comprises:

b) said server computer system selecting from said set of URLs a subset of URLs of particular interest to a user. (col. 19, lines 9-29)

Art Unit: 2174

As per claim 10, Bendinelli, Moreas, and Lemmons teach the method as recited in Claim 9. Moreas further teaches wherein said step b) comprises said server computer system:

comparing characteristics describing each URL in said set of URLs with user-specified characteristics in said user profile; (col. 19, lines 9-29)

identifying a subset of said set of URLs, said subset satisfying said user-specified characteristics; and (col. 19, lines 9-19)

storing said subset of URLs but not the entire said set of URLs. (col. 20, lines 46-56)

As per claim 11, Bendinelli, Moreas, and Lemmon teach the method as recited in Claim 10 further comprising:

monitoring URLs selected by said user; (col. 19, lines 9-29) and

adding characteristics describing said URLs selected by said user to said user profile.

(col. 19, lines 9-29)

12. (Canceled).

As per claim 13, Bendinelli, Moreas, and Lemmon teach the method as recited in Claim 8, Bendinelli further teaches wherein said one or more URLs are communicated from said server computer system to said computer system via said set top box. (col. 5, lines 7-32)

14-43. (Canceled).

As per claim 44 and 49 rejected with the same rationale as claim 8. Supra.

Art Unit: 2174

As per claim 45 and 50 are of the same scope as claim 9. Supra.

As per claim 46 and 51 are of the same scope as claim 10. Supra.

As per claim 47 and 52 are of the same scope as claim 11. Supra.

As per claim 48 and 53 are of the same scope as claim 13. Supra.

***Response to Argument***

Applicant's arguments with respect to claims 8-11, 13, and 44-53 have been considered but are deemed to be moot in view of the new grounds of rejection.

**Conclusion**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

**Contact Information**

Art Unit: 2174

(Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peng Ke whose telephone number is (571) 272-4062. The examiner can normally be reached on M-Th and Alternate Fridays 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine L. Kincaid can be reached on (571) 272-4063. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
